

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
We were alerted that an employee downloaded and opened a malicious file from a phishing email. The file is reported to be malicious by 56 of 71 vendors on VirusTotal. The “from” name doesn’t match the signature name. There are misspellings and bad grammar throughout the email. The email also included a password to open the attachment. This ticket has been escalated to a level2 SOC Analyst.

Additional information

Known malicious file hash:
